

“Promoting Cooperation among European Regions for Capacity Building of Integrated Care Systems based on Innovative Services and Technologies”

What makes an integrated care ecosystem sustainable? Key aspects of life-cycle governance

Josep Roca

Need for Health System Redesign
deploying the Chronic Care Model

Disease management

Health management

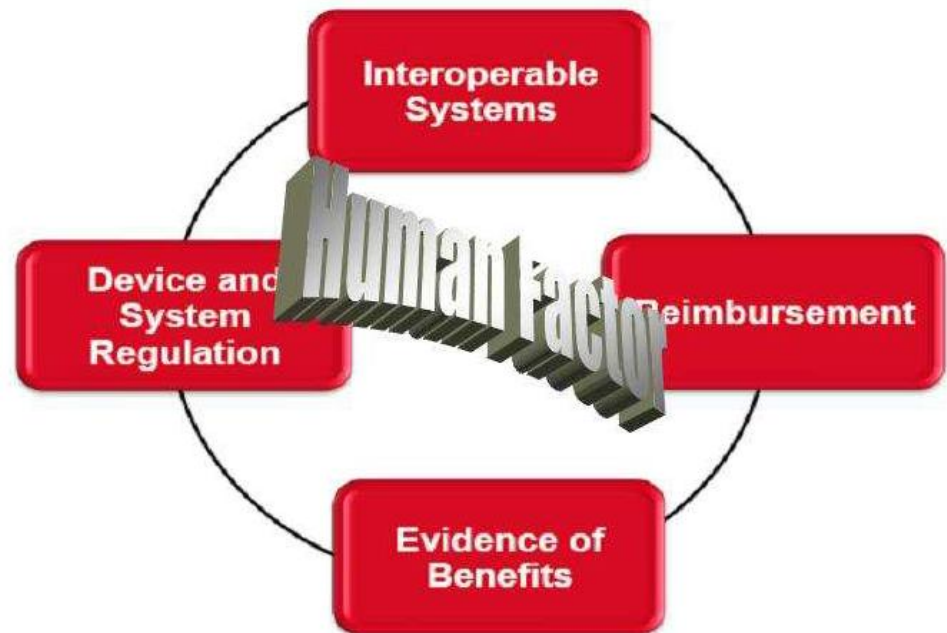

Delivery of Services to Citizens

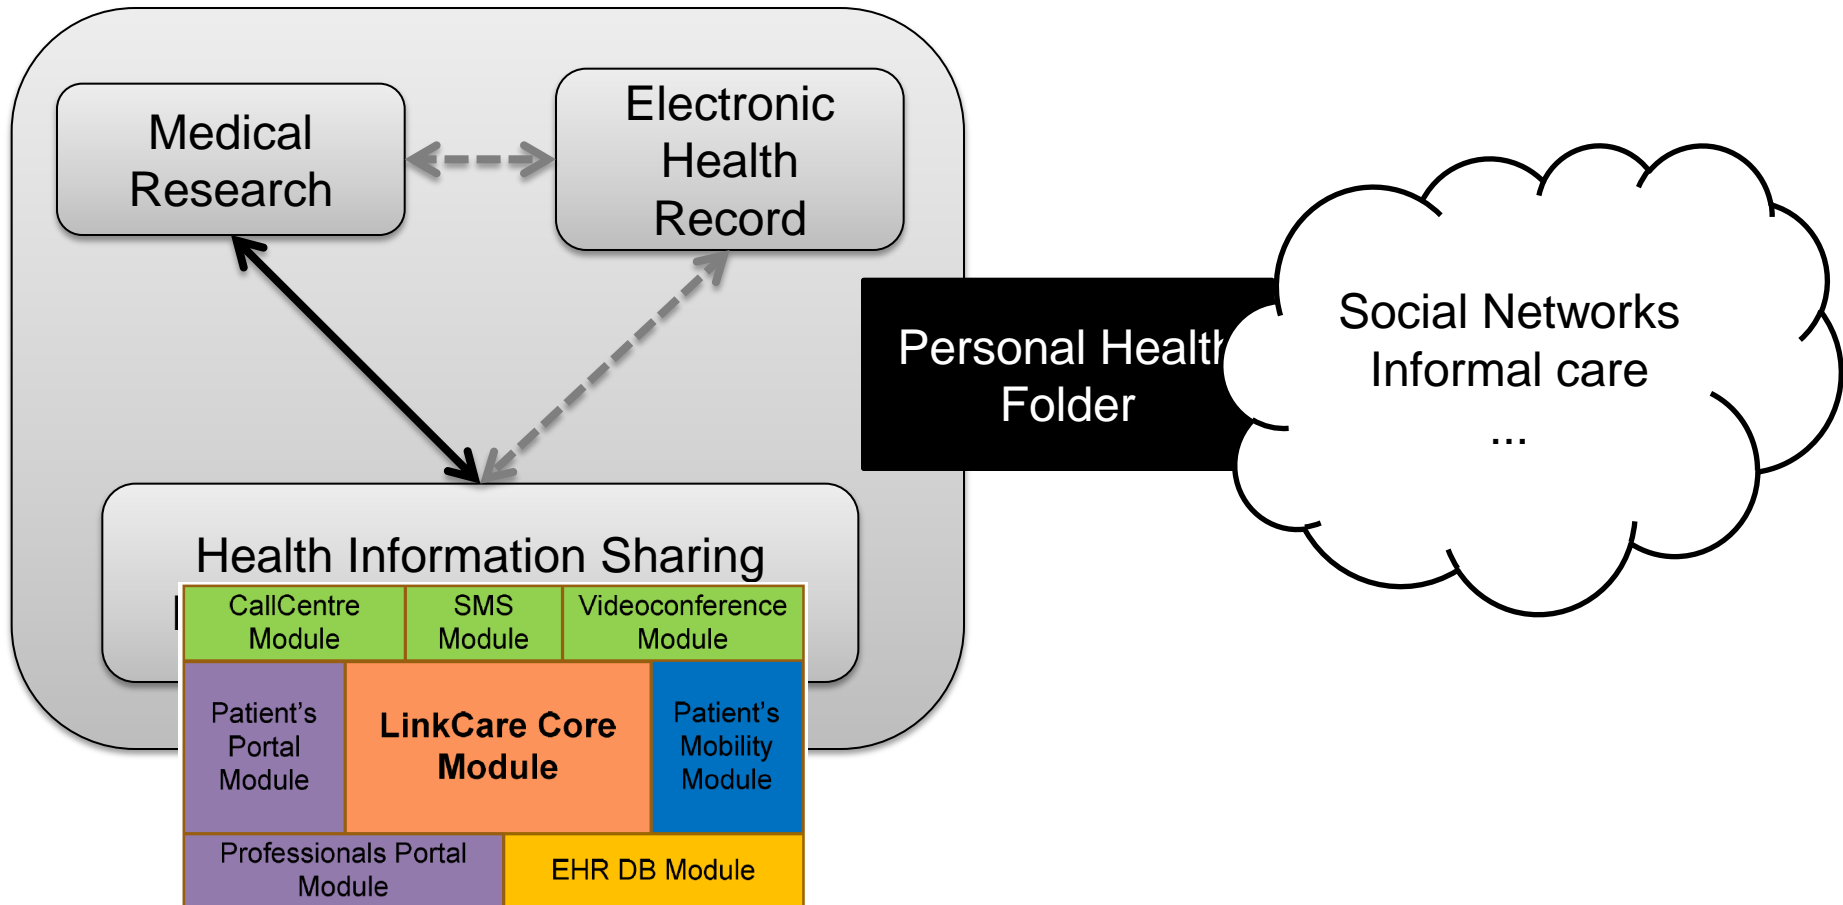

Lessons learnt from the field studies

Evidence of benefits

- Enhanced efficacy of Integrated Care Services
- High potential for cost-containment
- Show specific strategies for a succesful ICT deployment

Technological priorities

Factors influencing data sharing

Regulatory frame

Ethical Committees

Patient willingness

REIMBURSEMENT SCHEMES

Payment by outcomes from ICS-ICT involving different healthcare tiers

BUSINESS PLAN

Shared risks among actors

SERVICE SUSTAINABILITY

Transferring complexity to primary care

Work Force and Organizational Issues
